AN EXAMPLE OF OUR IT WORK

Successfully developed a project for a private individual, creating a unified system for trading and investing, system functionality:

- Place and manage orders to buy/sell cryptocurrencies and stocks using the APIs of various exchanges
- Placing and managing futures using the Binance exchange API
- Collection and detailed review of trading and investment statistics
- Transaction notifications on Telegram
- Two-factor authentication via Telegram
- Various automations to make trading easier
- Ability to add users to the system

A screenshot of a login form interface. At the top center is a black logo of a stylized bird or flame. Below it, the word "Login" is centered in a bold, black font. Underneath "Login" are two input fields: the first is labeled "Telegram username" and the second is labeled "Password". Both labels are in a small, gray font. Below the "Password" field is a light gray button with the text "Sign in" in a small, black font. The entire login form is enclosed in a white rounded rectangle with a subtle shadow, which is itself set against a light gray background. The entire image is framed by a thick pink border.

TWO-FACTOR AUTHENTICATION

Enter 4-digit code
