EXAMPLE OF PROJECT

Successfully developed a project for a private individual, creating a unified system for trading and investing, system functionality:

- Place and manage orders to buy/sell cryptocurrencies and stocks using the APIs of various exchanges
- Placing and managing futures using the Binance exchange API
- Collection and detailed review of trading and investment statistics
- Transaction notifications on Telegram
- Two-factor authentication via Telegram
- Various automations to make trading easier
- Ability to add users to the system

A mockup of a login form for a trading system. The form is white with a pink border and is set against a light gray background. At the top center of the form is a black logo of a stylized bird or flame. Below the logo, the word "Login" is centered in a bold, black font. There are two input fields: "Telegram username" and "Password", each with a horizontal line for text entry. Below the "Password" field is a "Sign in" button with a light gray background and black text. The background of the slide features a dark gray area with various faint, light gray geometric shapes and icons scattered across it.
