# AN EXAMPLE OF OUR IT WORK

Successfully developed a project for a private individual, creating a unified system for trading and investing, system functionality:

- Place and manage orders to buy/sell cryptocurrencies and stocks using the APIs of various exchanges
- Placing and managing futures using the Binance exchange API
- Collection and detailed review of trading and investment statistics
- Transaction notifications on Telegram
- Two-factor authentication via Telegram
- Various automations to make trading easier
- Ability to add users to the system

A login form interface is shown within a pink rectangular border. At the top center is a black phoenix logo. Below the logo, the word "Login" is centered in a bold, black font. Underneath, there are two input fields: the first is labeled "Telegram username" and the second is labeled "Password". Both labels are in a light gray font. Below the password field is a light gray button with the text "Sign in" in a darker gray font.

## TWO-FACTOR AUTHENTICATION

Enter 4-digit code
