- Individual UX/UI projects
- Photo/video content creation

# WEBSITE DEVELOPMENT OFFER

If you're aiming to scale or optimise your business, then you definitely need a modern, bespoke website that suits your needs, and here's why:

## The website is a tool for:

- **Shaping your brand image**

A website can showcase your activities in detail and at their best. Display processes, employees, certificates, technologies, locations, as well as any product and service catalogues.

- **Telling the world about your activities**

For the convenience of your customers and partners, detailed and important information can be consistently posted on the website and will be available to all, 24/7, anywhere in the world.

## ■ **Interaction with your customers**

The website helps to make it quick and easy to share all kinds of information: leave feedback, contact you, leave a complaint and more. This is very important, because the design and functionality of your website creates a user experience that will help the customer determine whether or not they will come back to you again.

## ■ **Attracting new clients, partners and workers**

As necessary, websites and information from the site are promoted in various ways to attract attention and mass appeal in all directions.

## ■ **Demonstrations of your work and professionalism**

You can put your portfolio on the website: descriptions of your completed tasks with photos and/or videos. Showing a large portfolio greatly increases your competitiveness in the eyes of visitors.

## ■ Automation and process optimisation

A CRM system (customer relationship management system) can be developed for the site and your business. The features of CRM systems are: sales of products and services; recording of requests and transactions; management of tasks and projects; online monitoring of KPIs; recording of clients for services; creation of necessary documents; cost calculator; integration with emails, telephony, social networks, SMS mailings; various individual process automation...

---

All of these capabilities are important enough to scale any business, so there are no barriers for the vebi team when it comes to achieving your strategic goals, because we understand how important growth and results are to you. We take a personalised approach to each client, focusing solely on the client's needs and objectives.

We offer you to consult about the website you want via email:

# COMPLEMENTARITY

Every business, regardless of size or industry, needs to have an online presence to be competitive in today's world. And while social media can play an important role in promoting a brand and engaging with audiences, it is the company's own website that is the official online presence.

An in-house website offers the company much more flexibility and control over the information the company details in a convenient way for customers and visitors, and the website provides the opportunity to interact with customers in different ways, using different tools suited to the target audience.

**The website and social media are two tools that complement each other with different functionality and goals.**

# Welcome to HOOLO LOUNGE

 CHILL

**Server Description**  
We are a fun community for adults (18+), with videocall parties, party games, and everyone is on camera. Many are drinkers and/or smokers, we hail from all walks of life. A little shy or anxious? We are really welcoming to new Taverners!

The purpose behind this server is to just have somewhere to go where you can share your creations, talk about whatever, and maybe make a friend. It would give me peace of mind if you would also think of this place as a safe haven. If you don't know what to do or where to go when you're having a bad day please come here and chill.

In regards to the name of the server it basically just means to always loot your kill in BR games, rpgs, etc. It's also kind of a Cop thing where you might here sometimes Officers will say that it was a good shoot when describing a shoot out or whatever. At the end of the day I just thought it sounded cool.

# AN EXAMPLE OF OUR IT WORK

Successfully developed a project for a private individual, creating a unified system for trading and investing, system functionality:

- Place and manage orders to buy/sell cryptocurrencies and stocks using the APIs of various exchanges
- Placing and managing futures using the Binance exchange API
- Collection and detailed review of trading and investment statistics
- Transaction notifications on Telegram
- Two-factor authentication via Telegram
- Various automations to make trading easier
- Ability to add users to the system

## TWO-FACTOR AUTHENTICATION
