- Social media design creation
- Design templates creation for company emails and documents
- Individual UX/UI projects
- Photo/video content creation

WEBSITE UPDATE OFFER

Modern internet space is overcrowded with goods and services, that's why it is very important to attract new customers, because it's not a secret that people often judge about the quality of services and products of the company on the first impression, which is likely to be formed when a potential client visits you and competitors, comparing different companies and their websites, before making a decision about buying.

A website update is required if:

- **No web analytics connection**

Web analytics tools and services will help you to: optimise marketing activities, analyse website traffic, analyse e-commerce, analyse usability, analyse visitor behaviour and preferences, compare yourself with competitors and global trends.

- **No adaptability for mobile devices**

In today's world, it is very important to have an adaptive design, because there are some clear trends such as the displacement of stationary devices by mobile devices.

- **The website is slow**

Website performance plays an important role in the success of any online business. High-performing sites are better at attracting and retaining users than slow sites. A 40% reduction in subjective wait times enabled Pinterest to increase registrations and conversions from search engines by 15%.

- **The website is not suitable for your needs**

With so many possible tools, automations and different solutions that can be applied, it certainly doesn't hurt to have a website that suits your needs, in order to successfully scale your business.

- **The website does not build brand uniqueness**

A website can affect brand image in different ways. It is worth being aware of this and not only avoiding mistakes when designing a website, but also using the website as a channel to build a strong and unique brand.

- **There is no possibility of interaction on the website**

The ability to contact a company on a website has long been a basic and convenient feature for both, website visitors and the company. The contact option is just one of the many ways in which a visitor can interact with you on the site.

- **The website does not demonstrate your professionalism**

In a consistent, detailed and user-friendly way, your portfolio of works can be placed on your website. This is very important because it is often the portfolio that is the key factor in making a purchase decision.

■ Website design is outdated (UX/UI design)

To demonstrate the importance of UX design, we turn to statistics from the world's leading UX design agency, Intechnic:

- 70% of users may leave the site if they don't like the interface design;
- 62% of them share their negative experiences with other users;
- 79% will never return to a website if they had difficulty using it the first time.

■ The site does not attract people

A website can attract new: customers, partners and employees. As necessary, websites and information from the site are promoted in different ways to attract attention and scale in all directions.

We offer you to consult about the website you want via email:

Welcome to HOOLO LOUNGE

 CHILL

Server Description

We are a fun community for adults (18+), with videocall parties, party games, and everyone is on camera. Many are drinkers and/or smokers, we hail from all walks of life. A little shy or anxious? We are really welcoming to new Taverners!

The purpose behind this server is to just have somewhere to go where you can share your creations, talk about whatever, and maybe make a friend. It would give me peace of mind if you would also think of this place as a safe haven. If you don't know what to do or where to go when you're having a bad day please come here and chill.

In regards to the name of the server it basically just means to always loot your kill in BR games, rpgs, etc. It's also kind of a Cop thing where you might here sometimes Officers will say that it was a good shoot when describing a shoot out or whatever. At the end of the day I just thought it sounded cool.

AN EXAMPLE OF OUR IT WORK

Successfully developed a project for a private individual, creating a unified system for trading and investing, system functionality:

- Place and manage orders to buy/sell cryptocurrencies and stocks using the APIs of various exchanges
- Placing and managing futures using the Binance exchange API
- Collection and detailed review of trading and investment statistics
- Transaction notifications on Telegram
- Two-factor authentication via Telegram
- Various automations to make trading easier
- Ability to add users to the system

TWO-FACTOR AUTHENTICATION
